

<u>Great American Aviation</u> specializes in the placement of hull, liability and excess liability across a wide array of aviation-related risks. However, aviation is a complex industry with a variety of different exposures. Traditional aviation and casualty policies often have limitations or coverage gaps related to environmental pollution hazards. <u>Great American Environmental</u> offers a variety of environmental liability insurance products that fill in the gaps left by typical aviation liability insurance and other casualty lines.

Understanding AeroProtect Liability Policy

Our AeroProtect policy helps protect against bodily injury, property damage, clean-up costs and legal expenses resulting from pollution conditions associated with your locations. It also provides coverage for pollution conditions arising from storage tanks and fixed based operations (FBOs). AeroProtect is built to satisfy your contractual obligations and to fill in coverage gaps left by other casualty lines.

Our AeroProtect Policy Features

- Limits of Liability up to \$50 million each pollution condition/\$100 million aggregate
- Multi-years terms available
- Coverage for locations in the U.S. or Canada

🕂 Common Airport Exposures

- Aboveground Storage and Underground Storage Tanks
- · Fuel distribution including truck loading and unloading
- · Hydraulic fluid and fuel releases from aircraft and other equipment
- Aircraft and vehicle maintenance
- Mold and other indoor air quality issues inside the terminal
- Historical spills and discharges
- · Site development or capital improvements leading to discovery of unknown pollution conditions
- Emerging contaminants like PFAS in fire-fighting foam (AFFF) and 1,4-dioxane in aircraft de-icing fluids

Aerospace Exposures

- Increasing number of private companies now performing R&D and testing of rockets
- · Pollution conditions associated with manufacturing and assembly operations
- Solid, liquid and gas-phase fuels released at launch and testing sites
- Fire suppression (AFFF)

Our Additional Policies

(STP)	This specifically addresses cleanup and third-party damages resulting from a release of the tanks contents. This policy can be used to satisfy federal and state-specific financial assurance requirements.
Contracting Services Environmental Liability (CSE)	This addresses cleanup and third-party damages resulting from services performed at third-party locations. This coverage is frequently used to provide coverage for fixed base operators.
Premises Environmental Liability (PRE)	This addresses cleanup and third-party damages associated with owned and leased locations. This is frequently used to address pollution conditions associated with hangar operation as well as airports.
